SENFENG LASER DEVICE

SENFENG LASER HEAD

Auto-focus

Senfeng Leiming users can set continuous focusing through the program to complete rapid perforation of thick plates and automatic cutting of plates of different thickness.

01

Water Cooling

The laser head focusing module is cooled by full-cycle water to reduce the fever caused by long-time cutting.

02

Rapid Lightning Cutting

Rapid lightning cutting carries ultra-high power laser, combined with Senfeng Leiming cutting system technology, to achieve extreme speed cutting.

03

Shining Cutting Technology

The shining cutting technology independently developed by Senfeng Leiming Laser can effectively solve the following problems: too many burrs, the cutting surface not smooth enough and difficult to cut highly reflective materials.
